- Zip:ofj

Bug Report #4: Redirect Behavior After Login with Browser Back/Forward Navigation

Bug ID: LogIn#6

Date Reported: July 22, 2025

Reported By: QA Tester

Assigned To: Frontend Development Team

Status: New

Bug Summary

Unexpected access to main page using browser forward navigation after logging out

Environment Details

- **Application:** Sauce Demo (<https://www.saucedemo.com/>)
- **Browser:** Chrome
- **Operating System:** Windows 11
- **Device:** Desktop

Severity

- **Severity:** Emergency

Bug Type

- ☐ UI/UX
- ☒ Functional

Steps to Reproduce

1. Navigate to the Login page
2. Log in with a valid email and password
3. Click on the "Log In" button
4. Wait to be redirected to the Main page
5. Press the browser back button
6. Press the browser forward button

Expected Result

-The website should log the user out

-Disable the forward browser button

-Error message displayed: "Epic sadface: Username is required."

Actual Result

- It navigates forward without logging out the user

Test Data Used

- Username: standard_user
- Password: secret_sauce

Bug Report #5: Verify login button is disabled when fields are empty

Bug ID: UiTestCases#8

Date Reported: July 22, 2025

Reported By: QA Tester

Assigned To: Frontend Development Team

Status: New

Bug Summary

Login button remains enabled when fields are empty

Environment Details

- **Application:** Sauce Demo (<https://www.saucedemo.com/>)
- **Browser:** Chrome
- **Operating System:** Windows 11
- **Device:** Desktop

Severity

- **Severity:** Low

Bug Type

- ☒ UI/UX
- ☐ Functional

Steps to Reproduce

1. User is on the Login page
2. No input provided in email or password fields

Expected Result

The Login button should be disabled when the fields are empty, preventing submission

Actual Result

- The **Login** button is **enabled** even when no data is entered
- This allows the user to attempt login with blank fields, which could result in unnecessary server calls or errors
