Bug reports

## 1-Test Plan Identifier

- Version: 1.0
  - Project: Sauce Demo Website Testing
  - Application URL: <https://www.saucedemo.com/>
  - Date: July 2025
-

## 2- Description

Sauce Demo (Swag Labs) is an e-commerce demonstration application that allows users to browse products, add them to a shopping cart, and complete purchases. This test plan validates the application's functionality, usability, and compatibility across different browsers.

## 3- Test Objectives:

- Verify that all features and workflows function as expected
- Ensure the application is user-friendly with intuitive navigation
- Validate security measures for login and checkout processes
- Test boundary conditions and error handling

## 4-Project Schedule:

| Duration                             | Activity                   | Assignee |
|--------------------------------------|----------------------------|----------|
| 22th July morning to 22th July night | Manual test main functions | sara     |
| 23th July morning to 23th July night | Automation                 | sara     |

## 5- Scope:

### **In Scope:**

- User authentication (login/logout)
- Product catalog browsing and filtering

- Shopping cart functionality
- Checkout process
- Navigation and UI elements
- Basic security testing

**Out of Scope:**

- Payment gateway integration (actual transactions)
- Database performance testing
- Load/stress testing
- API testing
- Third-party integrations

## 6- Test Cases:
